

*Enhancing international cooperation in science  
and technology between the European Union  
and the United States of America.*

## Mission statement

The European Union and the United States form the world's strongest and most comprehensive partnership in research and innovation. As bilateral cooperation in science, technology and innovation is critical to increasing economic growth and job creation as well as tackling global challenges, BILAT-USA 4.0 is committed to supporting research organizations, universities, companies, industry associations, government agencies and policy makers in transatlantic collaboration.

# Objectives

- Tackle Key Societal Challenges**
  - Identify and demonstrate the mutual benefits of science and technology cooperation.
  - Support research and innovation partnerships in shared scientific priorities.
- Invest in Research & Sustainable Growth**
  - Contribute to an increase in U.S. participation in Horizon 2020 and other European initiatives.
  - Advocate policies that promote new and existing partnerships.
- Support the Policy Dialogue**
  - Provide in-depth analysis to support strategic science & technology policy decisions.
  - Improve framework conditions to facilitate cooperation.
- Act as a Networking Platform**
  - Provide up-to-date information via website, social media and other channels.
  - Organize events to raise awareness about project activities & results.

# Team

BILAT USA 4.0 receives funding from the European Union's Horizon 2020 programme under grant agreement No. 692468.
